- Participating Member hereby designates and will use Premier as its Primary GPO for Participating Member and all Child Sites currently owned or subsequently acquired by Participating Member or any affiliate of Participating Member. Participating Member agrees to communicate such designation in writing to its distributors and wholesalers. “Primary GPO” means the national group purchasing organization (“GPO”) designated by Participating Member as its primary GPO to Vendors, service providers, wholesalers and/or distributors (collectively, “Sellers”), which among other things allows Participating Member to access contracts that have been negotiated and entered into between Sellers and their affiliates (collectively, “Premier GPO Contracts”) and credits Premier as the GPO for Participating Member’s purchases, including at a minimum and without limitation, to be the GPO attached to Premier GPO Contracts for Products purchased by Participating Member in cases where the contract price of a Product pursuant to a Premier GPO Contract is equal to or less than the contract price of such Product offered through (i) any other GPO or (ii) any direct, internal or “house” program offered by a wholesaler or distributor.
- Participating Member designates the below listed wholesaler to be its prime vendor for purchasing pharmaceutical Products under the Pharmacy Program. Participating Member further authorizes the below listed wholesaler to release total purchase data to Premier.
- Participating Member represents that all Products purchased under Premier group purchasing contracts are for Participating Member’s own operations, excluding operations which compete with retail trade. If Participating Member is a Multi-Facility System, Participating Member also represents that all pharmaceutical Products purchased under Premier group purchasing contracts by Child Sites in Participating Member’s system are for each such Child Site’s own operations, excluding operations which compete with retail trade. If Participating Member competes with retail trade, Participating Member acknowledges that it will be eligible to purchase pharmaceutical Products through the Program only from Premier Vendors that offer pricing to the Participating Member with the expectation and understanding that such Products will be re-sold.
- Participating Member understands that each Vendor contract and each wholesaler contract in the Program has individual terms and conditions.

Pharmacy Service Provider Classification	Description
Infusion Closed Door	Provides infusion therapy services, which are administered in a home setting, at the provider's premises or at a physician's office. Infusion Therapy is defined as the way that liquid solutions or liquid medications are administered directly into the blood stream through an intravenous catheter inserted in a vein in the body. Infusion therapies can include total parenteral nutrition, antibiotics or other drugs, blood, and chemotherapy. Must have a valid DEA certificate and pharmacy license. A "Closed Door" pharmacy has no sales to the general public.
Infusion Closed Door with Specialty	Provides infusion therapy services, which are administered in a home setting, at the provider's premises or at a physician's office. Infusion Therapy is defined as the way that liquid solutions or liquid medications are administered directly into the blood stream through an intravenous catheter inserted in a vein in the body. Infusion therapies can include total parenteral nutrition, antibiotics or other drugs, blood, and chemotherapy. Must have a valid DEA certificate and pharmacy license. A "Closed Door" pharmacy has no sales to the general public. Provider also dispenses specialty drugs (high cost and/or high maintenance infusion, injectable, oral or inhaled therapies that require complex care on an ongoing basis.)
Infusion Combo	Provides infusion therapy services, which are administered in a home setting, at the provider's premises or at a physician's office. Infusion Therapy is defined as the way that liquid solutions or liquid medications are administered directly into the blood stream through an intravenous catheter inserted in a vein in the body. Infusion therapies can include total parenteral nutrition, antibiotics or other drugs, blood, and chemotherapy. Must have a valid DEA certificate and pharmacy license. Provider also services retail patients.
Infusion Combo with Specialty	Provides infusion therapy services, which are administered in a home, at the provider's premises or at a physician's office. Infusion Therapy is defined as the way that liquid solutions or liquid medications are administered directly into the blood stream through an intravenous catheter inserted in a vein in the body. Infusion therapies can include total parenteral nutrition, antibiotics or other drugs, blood, and chemotherapy. Must have a valid DEA certificate and pharmacy license. Provider also serves retail patients and dispenses specialty drugs (high cost and/or high maintenance infusion, injectable, oral or inhaled therapies that require complex care on an ongoing basis.)
Infusion Suite	Provides infusion therapy services, in an outpatient infusion suite setting. Infusion Therapy is defined as the way that liquid solutions or liquid medications are administered directly into the blood stream through an intravenous catheter inserted in a vein in the body. Infusion therapies can include total parenteral nutrition, antibiotics or other drugs, blood, and chemotherapy. Must have a valid DEA certificate and pharmacy license.
Mail Order	A closed door pharmacy that provides home delivery of prescriptions for patients with chronic conditions. Provider also dispenses specialty drugs (high cost and/or high maintenance infusion, injectable, oral or inhaled therapies that require complex care on an ongoing basis.)
Retail	Provides prescription and over the counter drugs as well as other health related items to patients discharged from the hospital and to the general public.
Retail Closed Door	Provides prescription and over the counter drugs as well as other health related items to patients discharged from the hospital, employees and their covered entities.
Retail with Specialty	Provides prescription and over the counter drugs as well as other health related items to patients discharged from the hospital and to the general public. Provider also dispenses specialty drugs (high cost and/or high maintenance infusion, injectable, oral or inhaled therapies that require complex care on an ongoing basis.)
Physician Practice	A certified and licensed physician office and business unit that engages in the diagnosis and /or management of patients, including but not limited to, oncology, pediatrics, immunology, neurology related diseases, purchase, preparation, dispensing, administration, management, and billing of diagnostics and therapy.
Prison/Correctional Provider	Provides pharmaceuticals to inmates in a correctional facility. A "Closed Door" pharmacy has no sales to the general public
Specialty Pharmacy	Specialty pharmacies dispense and deliver specialty drugs to patients. They may also perform services for patients. Such services include, but not limited to managing reimbursement, performing case management and providing patient education.
NON ACUTE NON RETAIL	Health facilities that have no (or few) acute care beds and use pharmaceuticals for their own operations, excluding operations which compete with retail trade. Such facilities include, but are not limited to ambulatory surgery centers, diagnostic imaging centers, rehabilitation facilities, clinics, and hospices.
